

Nexus On-Line Managed Back-up & Data Recovery Services

Did you know that 60% of all data back up by tape is not usable?

For your business, data loss is disastrous. Nexus offers Big Business level Data Back-up and Recovery services for your company's critical applications. Via a single point of connection to your Network, all Applications Servers, PC's and Notebooks can be scheduled for automatic back-up at convenient and regular intervals.

Industry analysts estimate that a majority of tape back ups fail to properly restore company data. You don't want to learn that your present solution is not able to protect your critical information when a disaster has occurred.

You no longer need to manage daily tape back ups, move tapes offsite and face the risk of a 60% failure rate!

Without interrupting your daily business, we will transfer your Data offsite to our world class Data Center, where it is available for instant restoration. Our solution is particularly effective for organizations with multiple or remote site locations.

Back-ups are reliable, automatic and totally secure. You can retrieve your data independently any time of day.

With our Back-up and data recovery services:

- **Your company no longer needs to rely on tape media**
- **You store only the changes, not multiple copies of data, reducing total storage volume**
- **We offer Raid 5+1 storage array with a 99.99% uptime guarantee**
- **You only pay for what you use**
- **We are available 7x24x365: no waiting for the courier to retrieve tapes from storage when a failure occurs**

Need to manage changing Sarbanes-Oxley or other government regulations? Look no further.

The Sarbanes-Oxley Act is legislation affecting corporate governance, disclosure and financial accounting. It requires an organization to:

- Certify the accuracy of financial statements and disclosures
- Indicate in each periodic report whether or not there were significant changes in internal controls or related factors since their most recent evaluation, and disclose all deficiencies in the design or operation of internal controls
- Provide auditor's attestation to, and report on, management's assessment of the internal controls and procedures for financial reporting
- Report that controls and procedures for financial reporting and disclosure have been evaluated for effectiveness within the past 90 days

As a result of the Act and subsequent SEC rules and regulations, all internal controls and procedures related to financial disclosure will be required to be fully documented, certified and auditable. This means that companies will have to spend a great deal of time and money to ensure compliance.

At Nexus, our data and server management strategies and solutions help your company to achieve greater control over how to store, retrieve and report data, ensuring quicker compliance and the ability to manage changing regulations with minimum business disruption.

We help to keep your business compliant by providing the scalability that allows you to set storage levels per device, according to need, which makes for more reliable, more secure data.

Data storage and restoration:

- **FastBIT Technology** – 1/6th bandwidth used for Delta changes, which are held on dedicated disks for rapid restoration, with an optional second copy.
- **Centralized and automated back-up scheduling** - Auto Updates: Bit level changes are stored locally and backed-up to Nexus Data Center.
- **Supports all Windows / Intel Networks platforms and key applications including Exchange, SQL, Oracle;**
- **UNIX platforms and large database support options**
- **Encrypted data sent securely and immediately offsite – DES, Triple DES or Blowfish.**

Our Data Center is Industry Standard and includes redundant power supplies, dual paths to the Internet and fire suppression. Full technical details are available.

The Nexus Back-up and Recovery Service provides:

- **Fully Automatic Regular Data Storage**
- **Multiple Version Data Restoration**
- **Data Restore Wizard or Managed Restoration**
- **Remote Offline Storage for Data Archiving**
- **RAID 5 Redundant Servers: 99.99% uptime guarantee**
- **User Defined Back Up schedule, Encryption, and Notification**
- **Monthly Archive to Tape Option**
- **Data is encrypted and stored on:**
 - **High availability Network attached storage (NAS) device**
 - **Ultra high availability NAS**
- **Data can be moved to tape media**
