

Collocation and Hosting at the Nexus Data Center

*Protect your IT equipment in our Data Center.
Nexus has a secure and cost effective solution for Data storage*

Let us worry about protecting and manage your valuable data. Protect your IT equipment in our world class Data Center at only a small fraction of the cost of setting up your servers at your own facility.

When new customers move to us, **25-50%** of their systems have major problems:

2500 Client Networks monitored by Nexus:

- Less than 1% have minor problems
- In less than 0.01% a major problem occurs!

Nexus Management's Collocation and Hosting solutions protect your equipment from power failure, fire and intrusion. You retain as much control as your business requires. We offer a reliable, secure, and controlled environment for your hardware and equipment with a **Network uptime of 99.99%**. If you wish, we'll provide you with custom-built servers and install the necessary software of your choice. **You** control the content and administration; **we** provide the 24/7 monitoring, support, and network availability, and ensure your servers are always online.

At Nexus, we offer global strategic and technical solutions to our customers since 1989. Our Data Center, with 14,000 SF of available space, was designed with customer utility as one of its key elements. We have engineered common areas with the ability to accommodate users in the event of a disaster at their location. Each of the available offices and cubicles are fully equipped with Internet access.

We have leveraged the unique and very private location of the building in to provide multiple, redundant utility connections, resulting in a state-of-the-art facility and two separate power sub-station feeds. We offer diverse route (Qwest & Verizon) OC-3 connections to the Internet, UPS and generator assets and a trained engineering staff.

Services

- 7x24 technical support
- 7x24 site access
- 7x24 security
- 7x24 network monitoring and reporting and automatic notification
- Equipment leasing, maintenance
- Break/Fix is based on an hourly rate
