

## INTRODUCTION

Nexus' Managed Collocation Services provide our customers with the ability to collocate their data, website and/or IP Network at our world class data center. Our customers will be able to take advantage of services such as fully scalable bandwidth, secure facilities, redundant network and power connectivity and 24x7 monitoring and technical support. Customers retain the flexibility to administer and access their own equipment and applications without the complications of running their own data center, or they can elect Nexus Management to do it for them.

### Datacenter

Nexus' state of the art datacenter is located at our US Headquarters in Brunswick, Maine. Because this is also the location of our domestic NOC and help desk, Nexus has gone to great lengths to ensure that our facilities meet the highest standards, necessary for us to deliver our global monitoring and IP services to our clients. Highlights of the facility include:

- **Facility Statistics:**
  - 1700 Sq. Ft. datacenter raised floor space
  - 2<sup>nd</sup> generation Inergen fire suppression system
  - Redundant power feeds/grids (Brunswick/Freeport)
